Dear Polymathian,

Being apart of the Polymathian team would be an amazing pleasure and experience. I love to be challenged and to learn from them to become a better and more efficient programmer. I also have experience in Python from my previous work at GroupCCTV, and C knowledge through tutoring at the University of Queensland. I also really enjoy engaging with customers and telling them how amazing my code is and listening to their feedback in order to better myself. I have gained some experience in modern front end technologies with my superthesis project where I am building a webapp (and a phoneapp) which interfaces with a smarthome ecosystem.

Thank you for your time and I look forward to hearing a response,
Daniel
